Training & Course Management Platform

Module-Wise Functional & Screen Documentation

Prepared from the provided handwritten requirements and organized into a structured functional specification.

1. System Overview

The application is a training and course management platform for managing organizations, branches, courses, modules, syllabus, batches, classes, students, tutors, employees, attendance, payroll, fees, revenue, course materials, quizzes, invoices and subscriptions.

The platform should support role-based access at both module and screen/action level.

2. User Roles

Super Admin

• Manage organizations

• Manage subscriptions

• Monitor platform revenue

• Manage courses and fee structures

• Configure settings

• Manage roles and permissions

Organization Admin

• Manage students/users

• Manage employees and tutors

• Manage courses and batches

• Assign students and tutors

• Manage materials and syllabus

• Monitor attendance, payroll and revenue

Tutor

• View assigned courses and batches

• View class schedules and syllabus

• Access course materials

• Manage class-related information

• Access quiz functionality

• Track student/class progress

Student/User

• Register/enroll in courses

• Make payments

• View assigned batch and classes

• Access modules, syllabus and materials

• Take quizzes

• View learning progress

3. Organization Management

3.1 Organization List

Displays all registered organizations.

• Organization Name

• Organization Code

• Contact Person

• Email and Phone

• Subscription Plan and Dates

• Status

• Number of Branches

• Number of Employees

• Actions: View, Edit, Activate/Deactivate, Subscription, Branches, Revenue

3.2 Add Organization

• Organization Name, Code and Logo

• Email, Phone and Website

• Registered Address

• Contact Person

• Subscription Plan

• Start and End Dates

• Status

3.3 Organization Profile

• Basic Information

• Registered and branch addresses

• Primary contact information

• Subscription information

• Statistics: employees, students, tutors, courses and batches

3.4 Branch Management

• Branch List

• Add Branch

• Edit Branch

• Branch Details

• Branch Name, Code, Address, Contact, Email, Branch Manager and Status

4. Super Admin Dashboard

• Total Organizations

• Active Organizations

• Total and Active Subscriptions

• Upcoming Subscriptions

• Total Courses

• Total Students

• Total Tutors

• Total Revenue

Revenue graph should support daily, weekly, monthly and yearly views. Upcoming subscriptions should show organizations approaching expiry.

5. Subscription Management

Screens

• Subscription Plans

• Organization Subscriptions

• Upcoming Subscriptions

• Subscription Payment History

Subscription Plan Information

• Plan Name

• Description

• Duration

• Price

• Features

• Maximum Users/Courses

• Status

Subscription Record

• Organization

• Plan

• Start Date

• Expiry Date

• Amount

• Payment Status

• Subscription Status

6. Course Management

6.1 Course List

• Course Name and Code

• Category

• Duration

• Fee

• Number of Modules

• Number of Batches

• Status

• Actions: View, Edit, Delete, Modules, Syllabus, Timeline, Fee Structure

6.2 Add Course

• Course Name

• Course Code

• Description

• Category

• Duration

• Course Fee

• Course Image

• Status

7. Course Structure & Curriculum

```
Course
■■■ Timeline
■■■ Modules
■ ■■■ Subjects
■ ■■■ Sessions
■ ■■■ Topics
■■■ Syllabus
■■■ Course Materials
■■■ Quizzes
```

Screens

• Course Timeline

• Module Management

• Syllabus Management

• Session/Class Configuration

Syllabus visibility should be based on course, batch, session and date. Class configuration includes course, batch, module, subject, date, start/end time, duration and tutor.

8. Batch Management

Screens

• Batch List

• Add Batch

• Batch Details

Batch Information

• Batch Name

• Course

• Start/End Dates

• Maximum Students

• Class Schedule

• Tutor

• Status

Batch Details should show batch information, students, tutor, course, timeline, classes, attendance and progress.

9. Student/User Management

9.1 Student Sources

• Website registration

• Direct contacts

• References

• Organization registration

9.2 Student List

• Name

• Email

• Phone

• Registration Date

• Course

• Batch

• Payment Status

• Account Status

9.3 Assign Student to Batch

```
Select Student
↓
Verify Payment
↓
Select Course
↓
Select Available Batch
↓
Assign Student
↓
Generate Credentials
↓
Send Credentials by Email
```

9.4 Student Profile

• Personal and Contact Information

• Course and Batch

• Payment History

• Attendance

• Learning Progress

• Materials

• Quiz Results

10. Tutor Management

Screens

• Tutor List

• Add Tutor

• Tutor Assignment

• Tutor Profile

Tutor Information

• Name

• Email

• Phone

• Qualification

• Experience

• Expertise

• Joining Date

• Salary

• Bank Details

• Status

Tutor assignment should consider course, module, batch, subject and availability. After assignment, credentials should be generated and sent through email.

11. Tutor Portal

• Login, Forgot Password and Reset Password

• Dashboard

• My Courses

• My Batches

• Class Schedule

• Syllabus

• Course Materials

• Quiz Management

• Students

• Profile

Tutor dashboard should display assigned courses, batches, today's classes, upcoming classes, pending classes, student count and course progress.

Syllabus should follow Course → Batch → Session → Date → Module → Subject → Topic.

12. Student Portal

• Login, Forgot Password and Reset Password

• Dashboard

• My Courses

• My Batch

• Class Schedule

• Course Details

• Course Materials

• Quiz

• Progress

• Payments

• Profile

Dashboard should display enrolled courses, assigned batch, upcoming/completed classes, course progress, pending payments and quiz status.

13. Website Course Module

Screens

• Course Listing

• Course Details

• Course Enrollment

• Payment Screen

• Payment Success

Course details should include description, duration, modules, timeline, syllabus, fee, available batches, tutor information and course breakdown.

```
Website
↓
Select Course
↓
View Course Details
↓
Select Batch
↓
Payment
↓
Payment Success
↓
Create Student / Enrollment
↓
Assign Batch
↓
Generate Credentials
↓
Send Email
↓
Student Login
```

14. Employee Management

Screens

• Employee List

• Add Employee

• Role & Screen Access

• Employee Profile

• Employee Attendance

• Employee Work Progress

• Payslip

Add Employee

• Personal Details

• Contact Details

• Address

• Department

• Designation

• Joining Date

• Salary Structure

• Bank Details

• Login Details

• Role

Employee access must be controlled by role, module and screen permissions.

15. Salary & Payroll

Screens

• Salary Structure

• Employee Salary

• Monthly Payroll

• Payslip Generation

Salary Components

• Basic Salary

• Allowances

• Deductions

• Bonuses

• Incentives

• Tax/Other Deductions

Monthly payroll should calculate salary using employee salary structure, attendance, leave, deductions, bonuses and other configured components.

16. Attendance Management

• Attendance List

• Check-In / Check-Out

• Attendance Reports

Attendance should capture date, check-in, check-out, working hours, status, employee and applicable leave information.

17. Revenue Management

Revenue Dashboard

• Total Course Revenue

• Employee Salary Expense

• Total Revenue

• Pending Amount

• Expected Revenue

• Monthly Revenue

• Paid Amount

• Outstanding Amount

Course Revenue

• Course

• Number of Students

• Course Fee

• Total Revenue

• Paid Amount

• Pending Amount

Batch Revenue

Display financial information for each batch.

Employee Expense

• Number of Employees

• Salary Expense

• Monthly Expense

• Pending Salary

• Paid Salary

Pending & Expected Amount

• Pending Student Payments

• Expected Course Revenue

• Pending Subscription Payments

• Other Outstanding Amounts

```
Total Revenue
- Employee Expenses
- Other Expenses
----------------
Net Revenue
```

18. Fee Structure

• Fee Structure List

• Add Fee Structure

• Fee Calculation

Supported pricing models may include monthly, weekly, module-wise and course-wise fees, internship fees, coupons and discounts.

19. Course Material Management

• Material List

• Add Course Material

• Material Access

Materials should be mapped to course, module, subject and session. Access should be restricted to users with the relevant course/batch access.

20. Quiz Management

• Quiz List

• Create Quiz

• Student Quiz

• Quiz Results

Quiz questions should be generated or selected based on the configured syllabus. Results should capture student, course, quiz, score, percentage and attempt date.

21. Invoice Management

• Invoice List

• Invoice Details

• Invoice Generation

Invoice should support configurable organization logo, header, footer, address, contact information, invoice number, customer information, course/service, amount, discount, tax, total and payment status.

22. Settings

Organization Settings

• Organization Name

• Logo

• Address

• Contact Details

• Website

• Email

Invoice Settings

• Logo

• Header

• Footer

• Invoice Format

• Terms & Conditions

Email Settings

• Student Credentials

• Tutor Credentials

• Employee Credentials

• Payment Confirmation

• Enrollment Confirmation

• Subscription Notifications

General Settings

• Date Format

• Time Format

• Currency

• Time Zone

• Notification Settings

23. Role & Permission Management

• Role List

• Create Role

• Permission Matrix

Roles may include Super Admin, Organization Admin, HR, Tutor, Employee and Student.

Permission	Purpose
View	View records
Add	Create records
Edit	Modify records
Delete	Remove records
Export	Export information
Approve	Approve applicable transactions

24. Notification & Email Module

• Student Registration

• Payment Successful

• Enrollment Confirmation

• Batch Assignment

• Student/Tutor/Employee Credentials

• Subscription Expiry

• Payment Pending

• Class Reminders

• Quiz Availability

• Payslip Availability

25. Recommended Application Navigation

Tutor Portal	Dashboard, Courses, Batches, Classes, Syllabus, Materials, Quizzes
Student Portal	Dashboard, Courses, Batch, Classes, Materials, Quiz, Progress
Employee	List, Add, Profile, Attendance, Work Progress, Payslip
Attendance	List, Check-In/Out, Reports
Payroll	Salary Structure, Payroll, Payslip
Revenue	Dashboard, Course Revenue, Expenses, Pending Amount
Fee Management	Fee Structure, Calculation, Coupons
Course Materials	List, Add, Access
Quiz	List, Create, Student Quiz, Results
Invoice	List, Details, Generate
Roles & Permissions	Roles, Create Role, Permission Matrix
Notifications	Email, Alerts, Templates
Settings	Organization, Invoice, Email, General

28. Important Business Rules

1. A student should not be assigned to a batch until required payment is completed or an authorized admin approves the enrollment.

2. A tutor should only see courses and batches assigned to that tutor.

3. Students should only access courses and materials for which they are enrolled.

4. Syllabus visibility should be controlled by course, batch, session and date.

5. Quiz questions should be generated/selected from the applicable syllabus.

6. Employee salary calculations should use the configured salary structure and attendance information.

7. Employee and tutor credentials should be generated securely and sent through the configured email service.

8. Role-based permissions must control access to modules and individual screens/actions.

9. Course fees must support applicable discounts and coupons.

10. Revenue dashboards should separate course income, subscription income, employee expenses and outstanding amounts.

11. Invoice templates should use configured organization branding and billing information.

12. Subscription expiry should affect organization access according to configured subscription rules.

13. Important financial and administrative actions should maintain an audit/history record.

14. Deactivated or deleted records should not break historical payment, attendance, payroll or enrollment records.
